

Anya,

Welcome aboard. I'm sorry to throw you into the fire, but we have a critical situation with Triton-1.

As you know, Tropical Storm Adrian was a near-miss. It has exposed the inadequacy of our current risk posture. The board is demanding a concrete action plan at our meeting on the 28th.

I need a risk mitigation plan from you that identifies the top 3-5 physical risks and proposes specific, actionable solutions. We need to think in terms of immediate, short-term, and long-term fixes. I've attached the latest climate projection summary and the disturbing photo of the generator platform support from the ops team.

Forget the old 'review and monitor' approach. I need to show the board we are taking decisive action to protect our most valuable asset. Let me know what you need.

Best,

David Chen CEO, Oceanic Digital Solutions
