

MEMORANDUM

TO: Asset Management Team **FROM:** Regional Operations Lead **DATE:** October 5, 2023 **SUBJECT:** Q3 Pump Condition Data for Analysis

Team,

Please find attached the consolidated condition monitoring data for our primary water pumps from the last quarter. This data was compiled from three different regional systems, so it may have some inconsistencies.

We need to prepare this data for our upcoming lifecycle analysis and predictive maintenance modeling. Please perform a full data cleansing pass to ensure it is accurate and reliable before we proceed.

Key data points include asset ID, inspection date, operating temperature (in Celsius), vibration levels (mm/s), and the inspector's name. Pay close attention to any missing information or unusual readings.

Thank you.
